Simone Romagnoli

Software Engineer

About Me

Software Engineer passionate about **cloud architectures** in the context of scalable and resilient systems. I consider myself an **energetic team-worker** with a problem-solving and result-oriented attitude. My goal is to leverage **cloud technologies** to build robust and efficient solutions that drive business success enhancing **performance optimization, security, and innovative deployment strategies**

Foreign Languages

Italian - Native

English - C1

Spanish - B2

Hobbies

- **Basketball and beach-volley**: my passion for sports has made me develop a strong attitude towards leadership and team-working
- **Logic Games**: I love training myself with logic games like chess, crosswords and the Rubik's cube
- **Travelling**: I am a curious explorer seeking cultures, food, stories, places, and new perspectives worldwide.

I authorize to the treatment of personal data according to the administrative order of June 30, 2003, n. 196.

Experience

Reply — **Data Engineer**
September 2024 - Present

- Developed a service that uses **AI to detect financial frauds**, preventing +**100k euros** of frauds per month
- Used complex stacks with application logic implemented in *Python* and *SQL* for data transfer, and leveraging on *Redis* for fast retrieval of information in real-time systems
- Managed a data platform in an **AWS environment**, utilizing *CloudFormation* for infrastructure management
- Handled pipelines on **Databricks** hosted on **Azure** using *Pulumi* for infrastructure management

Prometeia — **Software Engineer**
October 2022 - September 2024

- Developed data integration projects in an **AWS environment** for 4 major italian banks, with *Apache Spark* and the *Scala* language
- Managed the **cloud transition of multiple legacy projects**, enhancing performance of ETL processes from over 6 hours to just 30 minutes
- Trained +**10 new developers on Apache Spark** in functional and technical courses

BSD Software — **Junior Full Stack Developer Intern**
March 2020 - May 2020

- Developed **frontend and backend** of an internships management web-application with the *Knockout* framework
- Matured experience with *Javascript*, *JQuery* and *C#* languages during a custom project

Education

UniBo — **Master's Degree in Computer Science and Engineering**
2020 - 2023
110/110 cum laude

- Thesis in *Project Management*: Realizzazione di un sistema di integrazione dati con tecnologia *Spark*: il caso di Prometeia.
- Developed projects like microservice systems, strategy games and machine learning algorithms using languages like *Kotlin*, *Java*, *Python* and *Scala*

UniBo — **Bachelor's Degree in Computer Science and Engineering**
2017 - 2020
100/110

- Thesis in *High Performance Computing*: Analisi del linguaggio x10 per architetture parallele: il caso di studio dell'algoritmo *Gift Wrapping*

Tech Skills

- **Cloud Computing**: hands-on experience with the **AWS Cloud Provider** and **Microsoft Azure Cloud Provider**; basic knowledge of **Databricks**
- **Object-Oriented Programming**: knowledge of programming patterns and respect for the object-oriented paradigm's design principles (*Java*, *Kotlin*, *Python*, *Scala*)
- **DevOps**: deep knowledge of the *DVCS Git* and experience in *Git Flow*; experience with *continuous integration* and *continuous delivery* streams; basic knowledge of containerization with *Docker*
- **More skills**: ability with LaTeX; mobile programming; logic programming; wide knowledge of the main operative systems (*Windows*, *MacOS* and *Linux*)
