

Simone Romagnoli

Software Engineer

About Me

Software Engineer with 4 years of experience in the **banking and finance** domain, passionate about **microservices** and **cloud architectures** in the context of scalable and resilient systems. I consider myself an **energetic team-worker** with a problem-solving and result-oriented attitude. My goal is to leverage **cloud-native technologies** to build robust and efficient solutions that drive business success enhancing **performance optimization, security, and innovative deployment strategies**

Foreign Languages

Italian - Native

English - C1

Spanish - B2

Hobbies

- **Basketball and beach-volley:** my passion for sports has made me develop a strong attitude towards leadership and team-working
- **Logic Games:** I love training myself with logic games like chess, crosswords and the Rubik's cube
- **Travelling:** I am a curious explorer seeking cultures, food, stories, places, and new perspectives worldwide.

I authorize to the treatment of personal data according to the administrative order of June 30, 2003, n. 196.

Experience

Data Reply

Software Engineer

September 2024 - Present

- Designed and developed **microservices** in *Python* with the *FastAPI* framework, exposing **REST APIs** consumed by real-time systems
- Developed a service that uses **ML to detect financial frauds**, preventing **+100k euros** of frauds per month
- Used complex stacks with application logic implemented in *Python* and *SQL* for data transfer, and leveraging on *Redis* for fast retrieval of information in real-time systems
- Managed a data platform in an **AWS environment** with *CloudFormation*, and pipelines on **Databricks** hosted on **Azure** with *Pulumi*, for infrastructure management

Prometeia

Software Engineer

October 2022 - September 2024

- Developed data integration projects in an **AWS environment** for 4 major italian banks, with *Apache Spark* and the *Scala* language
- Managed the **cloud transition of multiple legacy projects**, enhancing performance of ETL processes from over 6 hours to just 30 minutes
- Developed **Java microservices** with the *Quarkus* framework, applying **cloud-native** patterns
- Trained **+10 new developers on Apache Spark** in technical courses, leading **code reviews** to enforce best practices

BSD Software

Junior Full Stack Developer Intern

March 2020 - May 2020

- Developed **frontend and backend** of an internships management web-application with the *Knockout* framework, maturing experience with *Javascript*, *JQuery* and *C#*

Education

UniBo **Master's Degree in Computer Science and Engineering**

2020 - 2023

110/110 cum laude

- Thesis in *Project Management*: Realizzazione di un sistema di integrazione dati con tecnologia *Spark*: il caso di Prometeia.
- Developed projects like **microservice systems**, strategy games and ML algorithms in *Kotlin*, *Java*, *Python* and *Scala*

UniBo **Bachelor's Degree in Computer Science and Engineering**

2017 - 2020

100/110

- Thesis in *High Performance Computing*: Analisi del linguaggio x10 per architetture parallele: il caso di studio dell'algoritmo *Gift Wrapping*

Tech Skills

- **Certifications:** **AWS Data Engineer** - Associate
- **AI-Assisted Development:** **daily use of AI coding assistants** (*Claude*, *ChatGPT*) for **vibe coding** and **agentic programming**: prompt-driven prototyping, agent-based refactoring and test generation, with critical review of generated code
- **Microservices & OOP:** design and development of **microservices** with *Quarkus* and *FastAPI*, with **REST APIs** and **cloud-native** patterns; programming patterns and **object-oriented** design principles (*Java*, *Kotlin*, *Python*, *Scala*)
- **Cloud & Data:** hands-on experience with **AWS** and **Microsoft Azure**; basic knowledge of **Databricks**; solid *SQL* and **relational databases**; ETL and **real-time data pipelines** with *Apache Spark* and *Redis*
- **DevOps & Tooling:** deep knowledge of the *DVCS* *Git* and *Git Flow*; build automation with *Maven*; **CI/CD** streams; **automated testing** and **code review**; containerization with *Docker*
- **More skills:** mobile programming (*Flutter*); *LaTeX*; *Windows*, *MacOS*, *Linux*
